INTRODUCTION

Fremantle Sailing Club is committed to being a safe environment, that is trained and prepared for all emergency situations. Fremantle Sailing Club is striving to be an industry leader in **Emergency Preparedness** and **Response**.

All information in the Emergency Plan is to the Australian Standards. The Australian Standard adhered to in this Emergency Plan is:

AS3745 – 2010 Planning for Emergencies in Facilities

It is important that Fremantle Sailing Club staff, members and visitors are aware that there is an Emergency Plan, the location of the Emergency Plan and the information within the Emergency Plan. Staff shall familiarise themselves with the content, policies, procedures and actions outlined within the Emergency Plan.

Fremantle Sailing Club has a responsibility to its employees to provide training to:

- All Emergency Control Organisation (ECO) members (including nominated positions) are to be trained to develop the skills and knowledge necessary to undertake the duties set out in the emergency response procedures.
- Where first attack firefighting is included in the emergency procedures, training shall be provided to enable staff to competently execute their duties.
- All staff at Fremantle Sailing Club shall receive training to enable them to act in accordance with their role as outlined in the Emergency Plan.

1 PURPOSE

The purpose of the Emergency Plan is to outline the emergency response procedures for all occupants in case of an emergency at Fremantle Sailing Club. Fremantle Sailing Club is located at:

- 151 Marine Terrace, Fremantle WA 6160

The Emergency Plan is designed to ensure that Fremantle Sailing Club is properly prepared for all emergencies, in accordance with and meeting the requirements of Australian Standard 3745-2010 Planning for Emergencies in Facilities.

THE EMERGENCY PLAN COVERS ALL FREMANTLE SAILING CLUB'S AREAS:

Fremantle Sailing Club - Areas

White – Club House, Administration, Function Centre, and Carpark.

Yellow – Dingy Storage and Grassed Area.

Green – Member's Carpark, Hard Stand - Boat Storage, Jetties, Finger Jetties and all Boat Moorings.

Red – Leased Works Area, Tenant Precinct, Contractors Work Area and Boat Lifting.

*All Boat servicing, painting, mechanical and works are completed in this area by contractors (non FSC staff)

2 SCOPE

The Emergency Plan applies to all the buildings occupants including but not limited to staff, members, contractors, service providers, and visitors to Fremantle Sailing Club.

3 DISTRIBUTION OF EMERGENCY PLAN

The Emergency Plan must be printed and assessable for all occupants attending Fremantle Sailing Club. The Emergency Control Organisation (ECO) shall have access to a copy ensuring they understand the Emergency Plan, the roles, responsibilities and actions for all emergencies.

All members of the Emergency Planning Committee (EPC) shall have a copy of the Emergency Plan. Ensuring they understand the Emergency Plan, the roles, responsibilities and actions for all emergencies and positions within.

4 EMERGENCY PLANNING COMMITTEE (EPC)

The EPC, where necessary in collaboration with facility owners, managers and employers, shall be responsible for the development, implementation and maintenance of the emergency plan, emergency response procedures and related training. The EPC shall meet at least annually. A record of EPC meetings shall be made and retained.

5 EMERGENCY CONTROL ORGANISATION (ECO)

The Emergency Control Organisation (ECO) is responsible for ensuring the safety of all occupants including but not limited to staff, contractors, members, service providers, and visitors to Fremantle Sailing Club. Fremantle Sailing Club Emergency Control Organisation (ECO) shall include a Chief Warden. It should include Deputy Chief Wardens, Wardens and Area / Floor Wardens if applicable.

151 MARINE TERRACE, FREMANTLE WA 6160

Emergency Control Organisation	Helmet & Vest Colour	Name or Position
Chief Warden	White & White	Andrew Raven
Deputy Chief Warden	White & White	Jason Hands
Warden	Red & Red	Nominated Staff Member
Area Warden	Yellow & Yellow	Nominated Staff Member
Assembly Officer	Yellow & Black	Nominated Staff Member

ROLES AND RESPONSIBILITIES

The roles and responsibilities of Fremantle Sailing Club Emergency Control Organisation (ECO) are:

PRE-EMERGENCY

Chief Warden:

- Ensure a minimum of one (1) evacuation exercise per year is completed at each location.
- Ensure emergency response procedures, manuals, evacuation diagrams and the emergency plan are up to date with correct and compliant information.
- Attend training exercises and meetings.
- Ensure that the people filling all roles are competent in the role or task and necessary training is provided.
- Ensure all personnel are competent in the use of first strike equipment (fire extinguishers & fire blankets - as an example but not limited to).
- Maintain a current register of ECO members & replace ECO members when a position becomes vacant.
- Ensure ECO members are identifiable.
- Ensure all emergency equipment is available, assessable and all safety measures are being adhered to.

Deputy Chief Warden:

- Ensure you understand the role and responsibilities including filling the role of Chief Warden.
- Participate in regular training and exercises.
- Ensure emergency response or first strike equipment is maintained, available and compliant.

EMERGENCY PLAN

- Practise the use of specialist equipment.
- Ensure that personal protective equipment (PPE) and personal protective clothing (PPC) is maintained, available and compliant.

Warden:

- Ensure you understand the role and responsibilities including filling the role of Deputy and Chief Warden.
- Understand the key steps in an alarm activation and all emergencies.
- Ensure all staff are aware of their roles and responsibilities.

Area / Floor Warden:

- Ensure you are familiar with the location of all emergency equipment.
- Ensure emergency equipment is in good working order and you are confident in its operations.
- Understand the evacuation procedure and Emergency Muster Points.

EMERGENCY

Chief Warden:

- Place the Chief Warden helmet or vest on.
- Respond to all emergencies and assume control.
- Identify the type of emergency (have the area investigated).
- Initiate emergency response procedures:
 - Phone “000” and request the necessary Emergency Services.
 - Start evacuations (if applicable) by removing people most in danger first.
 - Refer to the appropriate “Emergency Colour Code” section for that type of emergency **(Page 26)**.
 - Keep all relevant people informed **(Page 47)**.
 - Follow the emergency procedures for that emergency and implement.
- Form an action plan and delegate roles and responsibilities.
- Ensure all non-essential staff are evacuated from the area of concern or completely from the area involved.
- Ensure that all occupants are advised of the situation and the correct actions to take.
- Brief responding Emergency Services on the emergency and the actions taken.
- Inform the Emergency Services of the evacuation progress.
- Follow and implement actions provided by the attending Emergency Services.
- Ensure the emergency procedure manual, attendance list, evacuation information (personal emergency evacuation plan – PEEP), members, visitor, contractor and staff attendance paperwork are collected.
- Contact the appropriate line manager and inform them of the situation.

Deputy Chief Warden:

- Place Deputy Chief Warden helmet and vest on.
- Fulfil the role of Chief Warden if the Chief Warden is not present or until they arrive.
- Respond to the emergency incident as directed by the Chief Warden.
- Provide situation reports to the Chief Warden as the emergency evolves.
- Handover and brief responding Emergency Services on arrival if applicable.

Area / Floor Warden:

- Ensure all people in your area are following the instructions of the Warden in Charge.
- Assist people away from danger.
- Direct people to the nominated emergency muster point.
- Complete a walk-through of your area to ensure all occupants are evacuated.
- Inform the Warden in Charge if assistance is required with evacuations within your area.

- Inform the Warden in Charge when your area is cleared of all occupants.

Assembly Officer:

- Assist the Warden in Charge with the evacuation of occupants from Fremantle Sailing Club.
- Go to the nominated emergency muster point and continually provide a safe area for the evacuated.
- Have the relevant paperwork to assist you in the role of Assembly Officer.
- Coordinate the evacuation of all occupants by directing staff in teams (minimum of two people in a team) to evacuate people in the following order:
 - 1st – Immediate danger
 - 2nd – Near the danger
 - 3rd – Impacted fire zone (if applicable)
 - 4th – From the building
- Document the arrival of all occupants to the emergency muster point.
- Do not allow unauthorised people to re-enter the building or areas in danger.
- Keep the Warden in Charge informed when all occupants are removed from:
 - 1st – Immediate danger
 - 2nd – Near the danger
 - 3rd – Impacted fire zone (if applicable)
 - 4th – From the building
- Inform the Emergency Services and Warden in Charge if people are not accounted for or unable to be evacuated.
- Document if anybody leaves the emergency muster point.

POST EMERGENCY

Chief Warden:

- After all emergency operations are completed, if the area is safe and has been handed back to you by the responding Emergency Services provide all occupants with the “all clear” information and have them return to the premises.
- Coordinate a debrief with the responding Emergency Services and Emergency Control Organisation (ECO) staff present.
- Coordinate a debrief with the Emergency Control Organisation (ECO) and present to Fremantle Sailing Club staff.
- Fill out the relevant paperwork.
- Complete the “Building Evacuation Incident Report Form” and forward it for discussion at the next Emergency Control Organisation (ECO) meeting.
- Ensure that all emergency response or first strike equipment used is removed, tested, replaced and reinstated as soon as possible.
- Ensure the area involved in the emergency is safe for work to resume as normal, if not take the appropriate action to have it rectified and the area isolated until it’s safe and habitable.
- Conduct an investigation if the situation warrants it. Use the information as a learning tool.
- Contact the Chief Warden and inform them of the situation if they are not already aware.

Deputy Chief Warden:

- Fulfil the role of Chief Warden if the Chief Warden is not present or until they arrive.
- Assist the Chief Warden where required to ensure all emergency response or first strike equipment used is removed, tested, replaced and reinstated as soon as possible.
- Assist the Chief Warden where required to ensure the area involved in the emergency is safe for work to resume as normal, if not take the appropriate action to have it rectified and the area isolated in the interim.

- Attend the debrief with the responding Emergency Services.
- Attend the debrief with Fremantle Sailing Club staff.

Warden:

- Fulfil the role of Chief Warden or Deputy Chief Warden if the Chief or Deputy Chief Warden are not present or until they arrive.
- Assist the Chief or Deputy Chief Warden where required to ensure all emergency response or first strike equipment used is removed, tested, replaced and reinstated as soon as possible.
- Assist the Chief or Deputy Chief Warden where required to ensure the area involved in the emergency is safe for work to resume as normal, if not take the appropriate action to have it rectified and the area isolated in the interim.
- Attend the debrief with the responding Emergency Services.
- Attend the debrief with FSC staff, members and contractors.

Area / Floor Warden:

- Complete a walkthrough of your area ensuring it is safe for all occupants to return to your area.
- Inform the Warden in Charge when the walk through has been completed and if it is or is not safe to re-enter.

Assembly Officer:

- Continually consider if the emergency muster point is a safe location and provide this information to the Emergency Control Organisation (ECO) and Warden in Charge.
- Pass on all requested documentation to the Emergency Services.
- Pass all documentation onto the Warden in Charge.

6 AUTHORITY AND INDEMNITY

During emergencies, instructions given by the emergency control organisation (ECO) personnel shall take precedence over the normal management structure. Facility owners, managers, occupiers and employers should obtain professional advice on the level of indemnity provided to ECO members. The ECO members should be advised of the level of indemnity provided.

7 TRAINING RECORDS

Adequate training shall be provided, applicable with the level of responsibility held within Fremantle Sailing Club. Training should be recorded with the date, session objectives, attendee's and if the objectives were met. All certificates applicable to the position and level of responsibility will be kept on a file by Fremantle Sailing Club with a copy being sufficient.

TRAINING

Additional to the induction process, all staff shall be familiar with the specific emergency procedures contained within the Emergency Plan. The necessary skills and knowledge shall include but not be limited to:

- Hierarchy of control during an emergency or emergency training applicable to Fremantle Sailing Club.
- The duties of the Emergency Control Organisation (ECO).
- How to respond to emergencies within Fremantle Sailing Club.
- An understanding of the Fremantle Sailing Club's Emergency Plan and Emergency Procedures.

- Communication during emergencies.
- Pre-emergency activities and training sessions.
- Emergency activities.
- Post emergency activities.
- People with disabilities and assistance required during an evacuation.
- Human behaviour during emergencies.
- Reacting to emergencies.
- An awareness and understanding of the fire detection system (if applicable).
- The 6 classes of fire (A, B, C, D, E, F).
- Hazardous materials and HAZMAT response including material safety data sheets (MSDS).
- The knowledge of emergency response or first strike equipment and its correct operation.
- Location of emergency response or first strike equipment.
- Location of first aid equipment.
- Emergency contact number (000) and how to call.
- Emergency Muster Points.
- The different types of evacuations.
- Emergency colour codes and what they represent.
- Fremantle Sailing Club staff initial actions when an alarm or emergency has occurred.

To comply with the requirements of Australian Standard 3745-2010 – Planning for Emergencies in Facilities, Fremantle Sailing Club is required to keep records of training and instructions given to all personnel. All documentation including training attendance records, observer’s checklist and emergency evacuation debrief are to be kept on Fremantle Sailing Club files and available for inspection if required.

CONTRACTORS & SERVICE PROVIDERS

Contractors and service providers should be inducted to Fremantle Sailing Club where possible and the appropriate emergency response information will be provided. This information will include but not be limited to:

- The duties of the Emergency Control Organisation (ECO).
- How to respond to emergencies within Fremantle Sailing Club.
- The Emergency Muster Points.
- Communications during an emergency.
- Location of emergency response or first strike equipment.
- Location of first aid equipment.
- What is expected of them and their initial actions when an alarm or emergency has occurred.

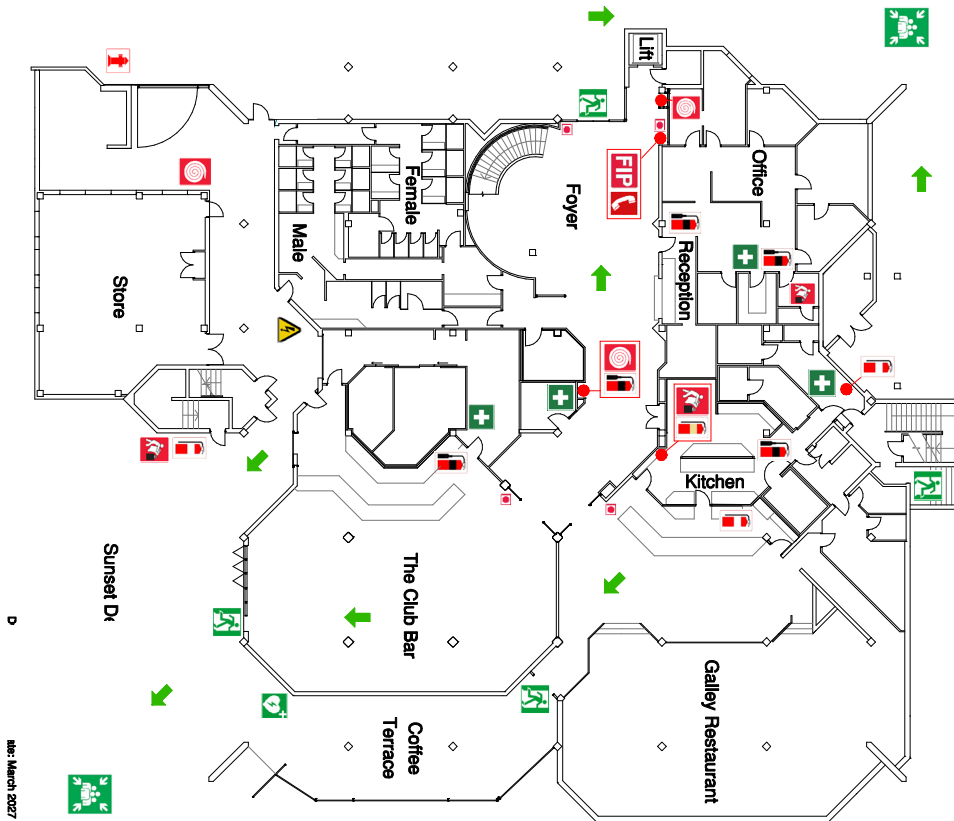

VISITORS

Visitors will not be inducted to Fremantle Sailing Club. Visitors where possible will have the appropriate emergency response information provided and access to the Emergency Plan. During any emergency visitors will always be directed by Fremantle Sailing Club staff. This information will include but not be limited to:

- The duties of the Emergency Control Organisation (ECO).
- How to respond to emergencies within Fremantle Sailing Club.
- The Emergency Muster Points.
- Communications during an emergency.
- Location of emergency response or first strike equipment.
- Location of first aid equipment.
- What is expected of them and their initial actions when an alarm or emergency has occurred.

9 EMERGENCY MUSTER POINTS

FREMANTLE SAILING CLUB 151 MARINE TERRACE, FREMANTLE WA 6160

There are 8 pre-determined emergency muster points located at Fremantle Sailing Club

**EMERGENCY
MUSTER
POINT**

- Grassed area near the visitor carpark
- Member's carpark
- Western end of the hard stand boat storage area
- The end of each jetty x 7 **Note: The jetty emergency muster points are only to be used if the evacuation path to land is compromised.**

10 BUILDING EMERGENCY EVACUATION PROCEDURES

PRE-EMERGENCY

- The evacuation of all occupants excluding Fremantle Sailing Club ECO members will be completed by following the directions of the Warden in Charge.
- All building occupants including and not limited to staff, members, contractors, service providers and visitors at the premises of Fremantle Sailing Club are to be aware of the site's emergency evacuation procedures, the nearest exit from their location and the alternative emergency muster points.
- All staff and volunteers working at Fremantle Sailing Club with a disability must have a Personal Emergency Evacuation Plan (PEEP) developed for their work location. The PEEP must be forwarded onto the Chief Warden.

→ **Note:** A disability requiring a PEEP is a disability that will require the person to need assistance during an evacuation.

EVACUATION TYPES AND LEVELS

Level One (1) EVACUATION

A level one (1) evacuation is where the evacuation does not require an emergency evacuation of the room, area, building or location.

Level Two (2) EVACUATION (Partial Evacuation)

This is the minimum level of evacuation when fire and/or smoke is involved.

A level two (2) evacuation is when you remove all occupants from the area impacted by the emergency.

- Internally this can be achieved by penetrating through a set of fire or smoke doors, whilst remaining inside the premises.
- Externally by the evacuation of only the impacted area and not the complete evacuation of the area or premise.

Level Three (3) EVACUATION (Full Evacuation)

A level three (3) evacuation is a complete evacuation of all occupants from the premises or area to the nominated external emergency muster point and possibly off site.

→ **Shelter in Place:** Shelter in place is where you do not exit the building or area and try to secure the premise & area (if applicable & safe to do so) to stop people from the outside getting into the building or area.

EMERGENCY

STAFF AND CONTRACTORS

On the sound or awareness of an alarm or emergency:

- Stop what you are doing.
- Render your area safe.
- Ensure all people in your immediate area are aware they must stop what they are doing, wait for instructions from the Warden in Charge.
- Provide assistance to anyone in immediate danger or experiencing difficulty evacuating from danger.
- If safe to do so and applicable - contain the hazard.
- If safe to do so and applicable - close doors as you leave but **DO NOT LOCK THEM.**
- Report to the appropriate location as instructed by the Warden in Charge.
- Follow all instructions given by the Warden in Charge.

ALL OTHER PEOPLE PRESENT

- Stop what you are doing.
- If you are not in immediate danger, wait for further instructions and directions from the Warden in Charge or staff.
- Provide assistance to anyone in immediate danger or experiencing difficulty evacuating from danger.
- Collect any personal belongings that are in your immediate location only.
- Ensure all persons in your immediate area are aware they must evacuate and follow the instructions from the Warden in Charge or staff.
- If safe to do so, close the doors as you leave but **DO NOT LOCK THEM.**
- If evacuated, report to the Assembly Officer located at the nominated Emergency Muster Point.
- Remain at the Emergency Muster Point and await further instructions from the Warden in Charge, Assembly Officer or Emergency Services.
- Do not leave the Emergency Muster Point unless instructed to do so by the Warden in Charge or Emergency Services.

POST EMERGENCY

STAFF AND CONTRACTORS

- Follow instructions from the Warden in Charge or Emergency Services.
- Continue to assist all people present at Fremantle Sailing Club at the Emergency Muster Point.
- Participate in the operational debrief.
- Fill out the appropriate post incident paperwork if required.
- Return to normal duties if safe to do so.

ALL OTHER PEOPLE PRESENT

- Follow instructions from the Warden in Charge, Assembly Officer or Emergency Services.
- If required prior to leaving the Emergency Muster Point, leave your contact details with the Assembly Officer.

14 PROCEDURES FOR SPECIFIC EMERGENCIES

The following emergencies detailed in the table below have been identified as those which may occur at Fremantle Sailing Club. The list is not exclusive and a regular review of the hazards should be undertaken by the Emergency Planning Committee (EPC) and Emergency Control Organisation (ECO) continually and documented annually.

Code	Emergency	Action
Red	Fire & Smoke	RACE - Remove yourself and others from immediate danger. Alert others. Contain the fire or smoke if safe to do so. Evacuate the area. Extinguish if safe to do so. Await further instructions. Call “000” - Fire Brigade.
Yellow	Internal Emergency (hazardous material incident, services failure)	Remove yourself and others from immediate danger. Alert others. Contain the hazard or isolate if safe to do so. Evacuate the area in danger and get the necessary help. Await further instructions. Call “000” - If Required.
Black	Personal Threat (armed hold up, intruder)	Do not place yourself in further danger (no heroics), remove yourself and others from the scene if possible and get help. Await further instructions. Call “000” - Police.
Purple	Bomb Threat (phone/written threat, suspicious package)	Alert others, remain calm, record information, ask key questions. DO NOT HANG UP THE PHONE even if they have hung up on you. Report and get help. Call “000” - Police & Fire Brigade.
Orange	Evacuations	Three (3) levels of evacuation applicable: <ul style="list-style-type: none"> - Shelter in Place. - Remove from danger, from the impacted fire zone into a non-impacted fire zone by going through fire or smoke doors (minimum level if fire and smoke is involved) partial evacuation. - Full external evacuation out of the building to the nominated emergency muster point.
Brown	External Emergency (external hazards or dangers, service failure)	Remain inside if that is the safest place to be, gather personal items, and await further instructions from the Warden in Charge. Do not take unnecessary risks. Contact the necessary and appropriate help. Call “000” – If Required.
Blue	Medical Emergency	Notify the Warden in Charge, commence first aid, alert others and get help. Follow D.R.S.A.B.C.D. Await further instructions. Call “000” – Ambulance.
No Colour	All Clear	When the threat has been mitigated and you have been given the “all clear”. This instruction can only come from the Warden in Charge or the Emergency Services present.

FIRE & SMOKE

CODE RED

The key actions to take in the event of discovering internal fire and or smoke – follow the RACEE steps below.

Remove, Alert, Contain, Evacuate / Extinguish

- R** **Remove** people in and from immediate danger.
- A** **Alert** others and **activate** the alarm.
Internal alert (notify people within the area), external alert (**Call 000 – Fire Brigade**).
- C** **Contain** the fire to the area of origin by closing doors and windows - if safe to do so.
- E** **Evacuate** people in immediate danger first, then the people most at risk.
- E** **Extinguish** the fire as a team – if safe to do so.

- **Once the evacuation has started, ensure an Assembly Officer is activated and located at the emergency muster point.**
- **Do not return to the property unless you are a part of an evacuation team, with a specific task.**
- **Wait at the emergency muster point for instructions from the Warden in Charge, Assembly Officer or Emergency Services.**

KITCHEN / COOKING FIRE

If oil or fat catches alight on the stove or BBQ:

- STOP** Turn off the heat source – if safe to do so.
Do not move flaming oil or fat.
- REMOVE** Remove people in immediate danger – if safe to do so.
- CONTAIN** Place a **fire blanket** over the fire.
Cover the pot with a lid or wooden chopping board.
- ALERT** Activate the alarm and notify people in the area, internal alert (people within the area), external alert (**Call 000 – Fire Brigade**). Stop others from entering the area.
- DO NOT** Use water to extinguish the fire.

Safety tips when cooking:

- When cooking, never leave food unattended.
- Avoid wearing loose clothing when cooking as it may catch alight.
- Never hang items such as tea towels near stoves or on cooking appliances.
- Take care when cooking with fats and oils.
- Turn off cooking appliances after use.
- Clean and maintain cooking appliances, exhaust fans and range hood filters.

EMERGENCY PLAN

CLOTHING FIRE

STOP, DROP, COVER and ROLL is a procedure used to extinguish a person's clothing.

- STOP** If a person's clothing should catch on fire, they should immediately stop where they are, as running and panic will fan the flames.
- DROP** The person should then drop to the ground immediately.
- COVER** Once on the ground, cover their face with their hands to prevent burns to the face and stop smoke entering the respiratory system.
- ROLL** To assist a person with burning clothing smother the flames with a fire blanket or roll them back and forth on the ground.

- Never beat the fire as this only increases oxygen flow to the fire, causing the fire to grow larger.
- Consider using the fire blanket to wrap and smother the fire.
- Seek and administer medical treatment allowing the most medically qualified person take control - Call "000" – and request an Ambulance ASAP.

To assist a person with burning clothing, roll them back and forth on the ground or smother the flames with a fire blanket.

ELECTRICAL FIRE

- STOP** Stop what you are doing.
- REMOVE** Remove people in immediate danger – if safe to do so.
- ALERT** Alert others, activate the alarm and notify people in the area, internal alert (people within the area), external alert (**Call 000 – Fire Brigade**).
- CONTAIN** Turn off the power supply to the impacted area. This can be done at the power point, sub power board or the mains meter box– if safe to do so.
- EXTINGUISH** Use a carbon dioxide (CO₂) fire extinguisher to extinguish the fire – if safe to do so. (CO₂ Fire Extinguisher is Red with a Black Band).

BIN FIRE

- STOP** Stop what you are doing.
- REMOVE** Remove people in and from immediate danger – if safe to do so.
- ALERT** Alert others, activate the alarm and notify people in the area, internal alert (people within the area), external alert (**Call 000 – Fire Brigade**).
- CONTAIN** Close the door to the room and stop others from entering the area.
- EXTINGUISH** Use a fire extinguisher or water.

BOAT FIRE

- STOP** Stop what you are doing.
- REMOVE** Remove people in and from immediate danger – if safe to do so.
- ALERT** Alert others, activate the alarm and notify people in the area, internal alert (people within the area), external alert (**Call 000 – Fire Brigade**).
- CONTAIN** Consider if trained and safe to do so cutting the near boats away or towing the impacted boat away from danger and to the beach area. Wet down nearby boats if safe to do so.
- EXTINGUISH** Boat fires are very hard to extinguish. Professional help will be needed and only if a fire is caught at the infant stage is it normally achievable.

FIRE EQUIPMENT

FIRE BLANKET

Fire blankets can be used to extinguish **small fat or oil fires** like BBQ or stove pot fires. They can also be used to wrap around a person whose clothes have caught alight.

When using a fire blanket:

- Turn off the heat to the stove or BBQ .
- Place the blanket over the fire, DO NOT throw it.
- Leave in place for 30 minutes to allow to cool.
- DO NOT use water on a fat or oil fire.

HOSE REEL

Hose reels are installed into the premises as part of the building code. They are installed for internal firefighting. The hose reels are connected to the mains water or tank water. Being a water filled hose it is not designed to be used on all types of fires. It is possible that if used on the wrong type of fire, it could cause injuries and additional damage to the structure. Hose Reels are to be used by qualified firefighters when fighting fires internally.

DRY CHEMICAL POWDER EXTINGUISHER (DCP) (WHITE BAND)

DCP fire extinguishers are used to extinguish combustible solids (i.e. paper and wood), flammable liquids (i.e. petrol) and electrical fires (i.e. meter box). Maintain a distance of three metres from a fire and only attempt to extinguish a small fire if it is safe to do so. Never endanger your life or others by attempting to extinguish large fires, especially inside a house or structure where hazardous smoke and heated gases are contained. Ensure you always have a safe exit path before using any fire extinguishers.

CARBON DIOXIDE EXTINGUISHER (CO₂) (BLACK BAND)

CO₂ fire extinguishers are used to extinguish energised electrical equipment (i.e. computers, meter box, powered equipment), combustible solids (i.e. paper and wood) and flammable liquids (i.e. petrol). Maintain a distance of two metres from a fire and only attempt to extinguish a small fire if it is safe to do so. Never endanger your life or others by attempting to extinguish large fires, especially inside a structure where hazardous smoke and heated gases are contained. Ensure you always have a safe exit path before using any fire extinguisher.

EMERGENCY PLAN

Extinguishers must be recharged or replaced after use.

Remember the word **PASS** when using a portable fire extinguisher:

PULL the safety pin, check the gauge and test away from the fire.

AIM the nozzle at the base of the flames.

SQUEEZE the handle to start the extinguisher.

SWEEP extinguisher from side to side until the fire is extinguished.

Estimated distance to stand from the fire, whilst using a fire extinguisher internally is 2-3 metres:

- 2 metres for a carbon dioxide fire extinguisher

- 2 metres for a wet chemical fire extinguisher

- 3 metres for a dry chemical powder fire extinguisher

Always have a partner with you and a safe exit behind you.

→ **Note:** If you cannot extinguish the fire with two (2) fire extinguishers, try to contain it if safe to do so by closing doors and windows. Inform the Warden in Charge and continue with the evacuations as directed by the Assembly Officer.

FIRE EXTINGUISHER GUIDE

TYPE OF FIRE, CLASS AND SUITABILITY

Two colour schemes for fire extinguishers exist.			A	B	C	E	F	D	Comments	
Pre-1997	Current	Extinguishing Agent	Wood Paper Plastic	Flammable & Combustible Liquids	Flammable Gases	Electrically Energised Equipment	Cooking Oils and Fats	Metal Fires		
		Water	YES	NO	NO	NO	NO	Use only special purpose extinguishers and seek expert advice.	Dangerous if used on flammable liquid, energised electrical equipment and cooking oil/fat fires.	
		Wet Chemical	YES	NO	NO	NO	YES		Dangerous if used on energised electrical equipment.	
		Foam*	YES	YES	NO	NO	LIMITED		Dangerous if used on energised electrical equipment.	
		Powder	(ABE)	YES	YES	YES	YES		NO	Look carefully at the extinguisher to determine if it is a BE or ABE unit as the capability is different.
			(BE)	NO	YES	YES	YES		YES	
		Carbon Dioxide	LIMITED	LIMITED	NO	YES	NO		Not suitable for outdoor use or smouldering deep-seated A Class Fires. Suitable for small fires only.	
		Vaporising Liquid	YES	LIMITED	LIMITED	YES	NO		Check the characteristics of the specific extinguishing agent.	
		Fire Blanket	LIMITED*	LIMITED	NO	NO	YES		* Fire Blankets may be used as a thermal barrier against radiated heat and to control a fire in clothes being worn by a person.	
		Fire Hose Reel	YES	NO	NO	NO	NO	Maximum length of hose is 36m.		

■ The class in which the agent is most effective.
■ Not recommend for this class of fires.

LIMITED The Extinguishant is not the agent of choice for the class of fire, but it may have a limited extinguishing capability.
 * Solvents such as alcohol or acetone mix with water and therefore require special foam.

FIRE INDICATOR PANEL (FIP)

- The FIP is located in the main entry to the club house on the ground floor
- The FIP is connected to DFES (Fire Brigade)
- The Direct Brigade Number (DBA) is 02/200

Chief Warden

- Contact the Emergency Services (Fire Brigade) As soon possible on “000” (provide name, address, what is happening and happened).
- Make an announcement to inform all occupants of the situation and what actions you want them to take.
- Evacuate all people away from danger. Evacuate the people in the most danger first. Then people near the danger etc.
- If a quick resolution is not found or Fremantle Sailing Club is going to be impacted for any period of time you must inform the Warden in Charge as soon as possible.
- Consider shutting of the mains services if applicable, if safe to do so and you are confident in doing so.
- Contact the Harbour Master (0447 566 772 / 0434 539 943)
- Alert people and start evacuating people in the most danger, near the danger.
- Have a Fremantle Sailing Club representative meet the arriving Emergency Services at the entry gate to provide the best access path to the Emergency.

INTERNAL EMERGENCY

CODE YELLOW

Internal emergencies are emergencies that occur inside the premises at Fremantle Sailing Club. These types of emergencies include but are not limited to:

- Hazardous substance (HAZMAT) incident.
- Loss of power supply.
- Loss of gas supply.
- Loss of water supply.
- Possible infrastructure or building collapse.

These may also reduce the capacity of the Emergency Services to function normally.

In the situation of the above but not limited to, the following should be implemented if possible:

- Stop what you are doing and render your area and the people within it safe.
- Remove all people from immediate danger.
- Notify the Warden in Charge.
- Do not take unnecessary risks, but if possible, contain or isolate the hazard.
- Ensure **"000 – Fire Brigade / Police or Ambulance"** have been called if required (provide name, address, what is happening and happened).
- Evacuate the room, area, floor and possibly the building on the directions of the Warden in Charge or Emergency Services.

HAZARDOUS MATERIAL (HAZMAT) INCIDENT

On discovery of a HAZMAT incident, the following should be implemented if possible:

- Stop what you are doing and render your area and the people in it safe.
- Remove people from the impacted area into a non-impacted area upwind and uphill if applicable. Possibly keep these people away from others (quarantine) until informed otherwise by the Emergency Services.
- Notify the Warden in Charge as soon as possible.
- Do not take any unnecessary risks and only if safe to do so try and contain or isolate the hazard.
- Follow the instructions on the Material Safety Data Sheets (MSDS).
- Ensure **"000 – Fire Brigade"** has been called if required (provide name, address, what is happening and happened).
- Evacuate the room, area, floor, and possibly the building on the directions of the Warden in Charge or Emergency Services.

SPILL OR LEAK

On the discovery or report of a spill or leak the following should be implemented as soon as possible:

- Stop what you are doing and render your area and the people in it safe.
- Remove all people from the impacted area into a non-impacted area upwind and uphill if applicable.
- Notify the Warden in Charge as soon as possible.
- Do not take any unnecessary risks, if safe to do so try and contain or isolate the hazard.

- Follow the instructions on the Material Safety Data Sheets (MSDS).
- Ensure **“000 – Fire Brigade”** has been called if required (provide name, address, what is happening and happened).
- Evacuate the area and possibly all buildings on the directions of the Warden in Charge or Emergency Services.

Minor spill:

- A minor spill is when the quantity of liquid spilt is less than 20 litres.

Major spill:

- A major spill is when the quantity of liquid spilt is greater than 20 litres.

Environmentally hazardous liquid:

- Is any liquid that has the potential to cause damage or direct harm to the environment.

Chief Warden:

- Contact the Emergency Services (Fire Brigade) as soon possible on **“000”** (provide name, address, what is happening and happened).
- Contact the Harbour Master (0447 566 772 / 0434 539 943).
- Make an announcement to inform occupants of the situation and what actions you want them to take.
- If a quick resolution is not found or the Fremantle Sailing Club is going to be impacted for any period of time you must inform the Warden in Charge as soon as possible.
- Consider shutting of the mains services if applicable, if safe to do so and you are confident to do so.

SEVEN (7) STEPS WHEN DEALING WITH A POSSIBLE HAZARDOUS MATERIAL SPILL:

1. Identify the spilled substance and refer to the Material Safety Data Sheet (MSDS).
2. Ensure the safety of yourself and others. Remove all people and equipment from immediate danger if safe to do so.
3. The staff member responsible for the work area at the time of the spill gets the first opportunity to minimise the extent of the spill.
4. Quickly assess the situation and decide whether you can handle the situation with the resources at hand and use of your training and qualifications.
5. Major spills (greater than 20 litres) are to be immediately reported to the Warden in Charge. The Warden in Charge will task staff the appropriate roles to ensure staff and visitors are safe. Ensure the spill is being contained and the area is kept clear.
6. If the Warden in Charge decides the spill needs specialist assistance they will contact **“000 – Fire Brigade”** (provide name, address, what is happening and happened). Await their arrival with all relevant paperwork.
7. Assist the Emergency Services with accurate information.

POWER FAILURE

The emergency lighting will activate at the loss of power. This will only provide additional light for a minimum of 2 hours to the building. Power is supplied to the Fremantle Sailing Club via the mains power supply only. Fremantle Sailing Club has generator in case of a power failure.

On discovery of power failure, the following should be implemented if possible:

- Stop what you are doing and render your area and the people in it safe.
- Notify the Warden in Charge as soon as possible.
- Try and identify if an individual section or the complete facility has lost power.
- The Warden in Charge will contact the Western Power for information.
- Ensure all occupants are safe and informed of the situation.

Warden in Charge:

- Make an announcement informing people of the situation and what actions you want them to take.
- Contact Western Power to gain information by phoning 13 10 87.
- If you are competent, confident and under the authority of the Warden in Charge go to the power box and inspect to see if a switch has tripped and is now in the off position.
- If a quick resolution is not found or the facility is going to be without power for a period of time you must inform the Warden in Charge.

In the event of a power failure the Fremantle Sailing Club does not have a backup supply. Due to this it is up to the Warden in Charge as to whether to close Fremantle Sailing Club immediately or continue to operate.

If operations are to continue the following constrictions will need to apply:

- Fremantle Sailing Club may stay open if there is enough lighting to provide a safe environment.
- If lighting levels become unsafe or staff resources become unable to provide a safe environment for the public, then Fremantle Sailing Club must close to the public.
- If Fremantle Sailing Club is closed to the public the staff can remain and work, only if safe to do so.

LOSS OF WATER SUPPLY

Loss of water may result in the complete loss of water supply to all parts or partial parts of the building.

Warden in Charge

- Upon your investigation if you believe there is an unsafe hazard that requires an evacuation and a response from the Fire Brigade activate the fire alarm by hitting the Manual Call Point on the FIP.
- Ensure all staff and occupants are aware of the required actions you require them to take such as the need to evacuate and the urgency required.
- Contact the Emergency Services (Fire Brigade) as soon possible on “000” (provide name, address, what is happening and happened) if required.
- Contact the service provider to gain information.
- Consider shutting off or turning on the mains services if applicable. This is only attempted with the authority of the Warden in Charge if safe to do so and if you are confident and trained to do so.

PERSONAL THREAT

CODE BLACK

This procedure outlines the initial response to a personal threat that may arise from aggressive or violent behaviours, an armed or unarmed person confronting occupants in a violent or threatening manner or where a person threatens to commit self-harm.

Once Police or other Emergency Services respond, they will assume control. Directions and actions will flow from the Emergency Services to the Warden in Charge and onto all other person's present.

Under no circumstances should any personnel place themselves or others in further danger or risk.

Wherever there are unlawful demands including threats of violence for money, property or other items these should be handed over without question - our aim is to remove the person or people making the threats from Fremantle Sailing Club as soon as possible with the least amount of physical and emotional trauma to everyone present.

IRRATIONAL PERSON

When an irrational person(s) undertakes a campaign of damage against staff, visitors and or the property, this can be an unmanageable situation. The first concern should be to remove occupants from the danger and expected path of the offender(s). If these people cannot be removed from the area, you should minimise their exposure by closing doors, moving behind walls or furniture as this will isolate you from the offender(s). If safe to do so raise the alarm, call "000 – Police" (provide name, address, what is happening and happened). If safe to do so occupants should be removed from the threatened area in a quiet fashion, trying not to provoke the offender(s).

AGGRESSIVE OR VIOLENT BEHAVIOUR

At all times the staff must protect their own safety and call for assistance as soon as possible.

Mild agitation and aggressive signs:

- Rapid breathing
- Clenched fists / teeth
- Flared nostrils
- Pacing
- Violent gestures
- Verbal abuse
- Refusing to leave an area or sit down

Very high to extreme agitation and aggressive signs:

- Shouting and swearing
- Argues intensely
- Throws or damages property
- Aggressive behaviour towards staff and visitors
- Possession of a potential weapon

If possible try and de-escalate the situation:

- Use an empathetic non-confrontational approach but set boundaries.
- Listen to the person or persons but avoid giving opinions on issues and grievances beyond your control.
- Only one person to speak quietly and calmly.
- Offer food, drink and a place to sit.
- Reduce stimulation in the area, by removing all bystanders, turning off radios, tv's etc.
- Avoid aggressive postures (keep your arms down) and avoid prolonged eye contact.
- Remove any potentially dangerous items in the area.
- Try to remove all additional staff, visitors and others in immediate danger to a safe area away from the conflict.
- Try to ascertain what the person or persons wants and the level of urgency.
- Encourage the person or persons to think rather than act on the situation.
- Do not touch the person without asking their permission to do so.
- Never turn your back on the person or persons.
- Allow the person or persons ample personal space.

ARMED CONFRONTATION

In a situation of an armed confrontation, hostage taking or siege, it is most important that under no circumstances should any personnel place themselves or others in further danger or risk.

The following should be implemented if possible:

- Obey the offender's instructions but do only what you are told and nothing more, do not volunteer information.
- Stay out of danger. If you are not directly involved leave the building if safe to do so. Raise the alarm, call **"000 – Police"** (provide name, address, what is happening and happened).
- Carefully observe any vehicles used by the offender(s), taking particular note of the registration, model, colour, number of occupants and their description.
- Observe the offender(s) as much as possible. Note their speech, mannerisms, clothing, scars, distinguishing features, and markings. Record these observations individually in writing as quickly as possible after the incident.
- Complete the armed hold-up checklist and hand it over to Police on their arrival.
- Close the area after the offender(s) have left. Do not allow anybody in until the Police have authorised access.
- Ask witnesses to remain until the Police arrive. Explain to the witnesses that their view of events, however fleeting could provide key information when pieced together with other evidence. If they are unable to remain, gather their details and pass them onto the Police.

When the intruder departs follow these steps:

- Contact the Police **"000"** (provide name, address, what is happening and happened).
- Provide a description of what happened:
 - The type of threat.
 - The exact location.
 - Your name.
 - Your role or position at Fremantle Sailing Club.
 - Description of the car and the direction it left in if you can.
 - Complete the armed hold-up checklist and hand it over to Police on their arrival.
 - Close off the area after the offender(s) are gone. Do not allow anybody in until the Police have completed their investigation and authorise access.

CIVIL DISOBEDIENCE AND ILLEGAL OCCUPANCY PROCEDURES

If there is evidence of civil disobedience and illegal occupancy, the following should be implemented if possible:

- Alert the Warden in Charge, staff, members and visitors of the civil disorder occurring in or around Fremantle Sailing Club.
- Remain in the current area, unless advised otherwise by the Warden in Charge or Emergency Services.
- Remain calm and **DO NOT** access the area or location where the civil disorder is occurring.
- If possible secure all medical supplies, cash, records and other valuable property whilst remaining in your current location.
- Ensure **"000 - Police"** have been called if required (provide name, address, what is happening and happened).

MISSING PERSON

All occupants who are reported as missing must be reported to the Warden in Charge immediately. Below is an explanation of the roles staff members should perform when a person is missing, or their absence is unexplained.

Unexplained absence is defined as but not limited to:

- The absence is unexplained.
- The person has not returned to the area within the allocated time.
- The person has possibly left Fremantle Sailing Club and is unauthorised to do so or a minor.
- The absence is reported to the police.

ROLES AND ACTIONS

Staff:

- Report to the Warden in Charge immediately when a person is identified as missing.
- Follow the direction and instructions of the Warden in Charge.
- Stay with the person who has reported the missing person and keep them calm.

Warden in Charge:

- Coordinate an internal search of Fremantle Sailing Club.
- Coordinate an external search of Fremantle Sailing Club.
- Coordinate a search of the immediate vicinity surrounding Fremantle Sailing Club.
- Notify additional members and request their assistance.
- Ensure the relevant paperwork has been filled out.
- Notify the local Police by phoning **"000"**.

When the missing person is located:

- Assess the person(s) for any signs of injury and respond accordingly.
- Document any injuries.
- Investigate and report the cause of the missing person to Fremantle Sailing Club.
- Notify immediate staff involved, Police, members, and all other people who have been informed or possibly assisting.

BOMB THREAT AND SUSPICIOUS PACKAGES

CODE PURPLE

The following guidelines are provided to assist with threat assessment and the subsequent response actions.

THREAT TYPES

Specific:

This type of threat is less common but likely to be more credible. The caller provides detail, which may describe the device, its placement, the reason, time of activation, building name, address etc.

Non-specific:

This type is the most common threat. Little detail is provided by the caller prior to the caller terminating the call.

Both types of threats should be taken seriously, and any decisions or actions should be made by the appropriate person. Where personnel receive or become aware of a bomb threat or similar form of intimidation – above all, keep calm and do not alarm other employees and visitors until “000 - Police” have been notified and then follow the instructions given by the Police over the phone and implemented by the Warden in Charge until the Emergency Services arrive and take control.

TELEPHONE THREAT

- Treat the threat as genuine and record information for the Police.
- Prolong the call, keep the person talking and possibly ask the following key questions:
 - The location of the bomb or package?
 - The time set for detonation?
 - Why was it placed in the location?
 - Who put the bomb there?
- **DO NOT** replace the handset or hang up the phone as this allows the phone call to be traced.

LETTER OR EMAIL THREAT

Handle the item as little as possible. If possible, place the item into a plastic zip lock bag to preserve any physical evidence.

When a suspicious object is reported or found the following steps are to be followed:

- Do not touch or disturb it.
- Keep the area clear by removing people from the immediate area and surrounding areas.
- Turn off all electronic equipment including mobile phones that may trigger the device.
- Raise the alarm ensuring the Warden in Charge is notified.
- Ensure “000 - Police” has been notified (provide name, address, what is happening and happened).

BOMB THREAT SEARCH PROCEDURES

The Warden in Charge will call on the assistance of the Emergency Services (Police and Fire Brigade) for direction and to instigate the search procedures. A briefing will be held prior to any search being conducted to establish the search method, search area(s) and means of communications and reporting. Under the guidance of the Police (via the phone – possibly). The search should concentrate initially upon the room or floors named or described in the bomb threat.

The search shall include the following procedures:

- Conduct a visual search from floor level to waist height (under chairs, tables and cabinets etc.), start and finish in a common area or point.
- Conduct a visual search from waist to ceiling height (behind curtains, window ledges, top of cabinets and air conditioning vents or ducts).

→ **Note:** If no particular floor or area has been specified in the threat, concentrate initially on the floors or areas accessible to the public starting at the lowest level.

- Search teams must always be a minimum of two people.
- As the areas are searched the Warden in Charge and Police need to be informed as soon as possible. Additionally, this information needs to be documented with the search time and which area was searched.
- Keep information within the search teams, Chief Warden, Deputy Warden, Warden, Police and other Emergency Services to avoid panic.
- If something is found that appears suspicious – **DO NOT** remove or touch it, notify the Warden in Charge, Police and other Emergency Services of its location and description.

SUSPICIOUS PACKAGES

A suspicious package may:

- Be a package of any shape or size.
- Be handwritten or have poorly typed addresses.
- Have incorrect spelling or incorrect titles.
- Have excessive postage and wrapping.
- Contain loose contents within the package.
- Has been posted from overseas.
- Has no return address.
- Has a powder, particles or crystals in or around the openings.
- Be any item you are apprehensive about.

SUSPICIOUS PACKAGES SEARCH

The most appropriate person to carry out the initial search are Fremantle Sailing Club staff. This is because they have the knowledge of “what belongs” or “what does not belong” in the area or location. The search should be aimed at identifying an object that is not normally found in an area or location. **Objects which should be looked at but not limited to could be:**

- Suspiciously labelled objects.
- An object similar to that described in the original threat.

- An object of unusual size, shape or sound.
- The presence of wires, string, powder, particles, crystals, explosive wrappings or other unfamiliar materials.

DISCOVERY OF A SUSPICIOUS PACKAGE

If you discover a suspicious object or package observe the following procedures:

- Never attempt to move or open it.
- Clear the area immediately by removing occupants from the immediate and surrounding areas with consideration of alternative exit routes.
- Raise the alarm and advise the Warden in Charge and Emergency Services.
- Ensure “**000 – Police & Fire Brigade**” have been notified (provide name, address, what is happening and happened) if the Emergency Services are not present.
- Follow instructions from the Emergency Services and the Warden in Charge.
- Turn off mobile phones or electrical items that may trigger or activate the package.

QUESTIONS TO ASK REGARDING A SUSPICIOUS PACKAGE

If you identify a suspicious package, ask yourself the following questions:

- Who is it addressed to, does it have the correct title, position and full name?
- Is the shape or size consistent with something that you have ordered?
- Is there a return address or details of the sender?
- Is it genuine and written legibly?
- Do you know the sender?
- Were you expecting a package?
- Has the package been opened?
- Is there any threatening wording on or in the package?
- Is it marked “private” or confidential”?
- Where was it sent from: locally, interstate or overseas?
- Is there an excessive amount of postage stamps on it?

- Is it excessively packaged and secured with tape?
- Is there any discoloration, leaking, smells, tin foil or wires?
- Does the package contain liquid or powder?
- Does the package have any overseas addresses, but local post stamps?
- Do the contents seem to have moved or dislodged?

If you feel that you cannot identify or are still apprehensive about the package on completion of the above, proceed with your emergency procedures for this type of hazard and ensure **"000 – Police & Fire Brigade"** have been notified (provide name, address, what is happening and happened).

ACTIONS TO TAKE REGARDING A SUSPICIOUS PACKAGE

If you receive a suspicious package via mail, courier or personal delivery undertake the following actions:

- Keep your hands away from your face to avoid possible or further contamination.
- Separate and isolate the people "possibly" exposed, from people who are present but not been exposed.
- Remain calm and instruct somebody to notify **"000 – Police & Fire Brigade"** (provide name, address, what is happening and happened).
- Remain in your current work area and stop others that have not been in contact with the package or area from entering.
- If possible but without leaving your work area wash your hands in warm water.
- Wait for the Emergency Services to arrive and assist.
- Follow the instructions from the Emergency Services.

If the item has NOT been opened:

- Place the item(s) in a plastic bag and seal it.
- Place all items in a second plastic bag and seal the second bag.

- Stay in your immediate work area. This also applies to co-workers in the same room.
- Stop others from entering and possible contamination.
- Remember you are not in immediate danger.
- Remain calm and follow instructions from the Warden in Charge.
- Ensure **"000 – Police & Fire Brigade"** have been notified (provide name, address, what is happening and happened).

If the item has been opened:

- Do not disturb the item any further.
- Do not pass the item around.
- Isolate the people possibly exposed from the non-exposed people.
- If any material has spilt from the item, do not try and clean it up, or brush it from your clothing. If possible, place an object over the package without disturbing it, such as a sealed bin.
- Stay in your immediate work area. This also applies to co-workers in the same room, stop others from entering and possible contamination.
- Remember you are not in immediate danger.
- Remain calm and follow instructions from the Warden in Charge and Emergency Services.
- Ensure **"000 – Police & Fire Brigade"** have been notified (provide name, address, what is happening and happened).

When notifying "000 – Police & Fire Brigade" advise them of following:

- Exact location of the incident including:
 - Fremantle Sailing Club (name).
 - 151 Marine Terrace, Fremantle (Street address).
 - Your name, title and position held.
 - The number of people potentially exposed.
 - A description of the package or device.
 - The current action or steps taken.

EVACUATION

CODE ORANGE

There are three levels of an evacuation. Each level is appropriate depending on the severity of the situation, hazard or emergency. Each level of evacuation can be increased or decreased by the Warden in Charge or the Emergency Services.

LEVEL ONE (1) EVACUATION

A level one (1) evacuation is where the evacuation does not require an emergency evacuation of the room, area, building or location.

LEVEL TWO (2) EVACUATION (PARTIAL EVACUATION)

This is the minimum level of evacuation when fire and or smoke is involved.

A level two (2) evacuation is when you remove all occupants from the area impacted by the emergency.

- Internally this can be achieved by penetrating through a set of fire or smoke doors, whilst remaining inside the premises.
- Externally by the evacuation of only the impacted area and not the complete evacuation of the area or premise.

LEVEL THREE (3) EVACUATION (FULL EVACUATION)

A level three (3) evacuation is a complete evacuation of all occupants from the premises or area to the nominated external Emergency Muster Point and possibly off site.

→ **Shelter in Place:** Shelter in place is where you do not exit the building and we try to secure the premise & buildings (if applicable & safe to do so) to stop people from the outside getting into the building.

→ **Note:** Do not return to Fremantle Sailing Club premises or grounds until it is deemed safe to do so, by the attending Emergency Services and Warden in Charge.

When performing any level of evacuation, you always work towards:

- Evacuating as many people as possible in the shortest amount of time.

This is done by:

- Evacuating the largest number of people, in the most danger.

Remember we always:

- Evacuate the people in the most danger first.

Evacuations are carried out by teams:

- Teams are made up of a minimum of two people for the safety of the people performing the evacuation.

EXTERNAL EMERGENCY

CODE BROWN

External emergencies are incidents external to Fremantle Sailing Club that threaten the:

- Structure of the buildings
- The safety of:
 - Visitors
 - Members
 - Staff
 - Other people onsite

It may also reduce the capacity of the Emergency Services to function normally.

External Emergencies include but are not limited to incidents in the immediate surrounds of Fremantle Sailing Club:

- Explosion
- Natural Disaster
- Impacts on the building or grounds
- Chemical spills with noxious vapours impacting people
- Bush fires with airborne embers and smoke
- Civil disturbance or police incident

In the event of any of the above but not limited to, the following should be implemented initially if applicable and possible:

- Take immediate refuge as far away from the incident as possible and consider the following:
 - When safe and on the guidance of the Warden in Charge or the attending Emergency Services remove all occupants from the impacted area to a non-impacted area.
 - Do not take unnecessary risks.
 - Ensure “**000 – Fire Brigade / Police / Ambulance**” has been called if required (provide name, address, what is happening and happened).
 - Do not evacuate until instructed to do so by the Warden in Charge or the Emergency Services.
 - Remain at the nominated location until you have been given the “all clear” by the Warden in Charge or Emergency Services.
 - Collect relevant paperwork and perform a roll call of all staff and visitors that were present prior to the incident.

EARTHQUAKE

Staff and visitors to Fremantle Sailing Club are to follow the instructions of the Warden in Charge during an earthquake. Do the following:

- Keep yourself and others calm.
- Ensure everybody moves away from windows and outside walls.
- Do not use the lifts.
- Keep away from glass, mirrors, large light fittings, bookcases and other objects that may fall.
- If possible, instruct occupants to take cover under a desk from falling debris or to move to an internal corner of a room, sit down and protect yourself and others.

Once the tremor has stopped:

- Look around for any injured or trapped people within your area and assist if possible.
- Wait for instructions to evacuate the building. Sometimes it is safer to remain in your current position, if the area has not suffered substantial damage.
- Ensure emergency evacuation stairwells are safe prior to moving through them.
- Always keep occupants away from glass and windows.
- Be prepared for aftershocks.

Chief Warden, Deputy Warden & Warden:

- Assess the injuries to people.
- Assess the damage to the building and determine if there are safe exit paths for people internal to the building.
- Ensure first aid is given to the people most in need.
- Ensure the Emergency Services are notified by calling “000 – Fire Brigade and Ambulance” (provide name, address, what is happening and happened).
- Shut down applicable mains supply if hazardous and only if safe to do so (power, gas, water).
- Initiate a controlled evacuation.
- It is important that a very good search of their area is conducted to ensure nobody is left in danger.
- People need to be evacuated to the safest emergency muster point.
- Pass onto the arriving Emergency Services the location of known occupants who have been unable to self-evacuate and any known missing persons.

BUSH FIRES

Bush fires in the surrounding area can still cause a lot of smoke and flying embers in and around Fremantle Sailing Club. If smoke is thick and causing coughing and sore eyes all doors and windows may need to be closed. The air conditioning will also possibly need to be shut down (but still have water running through it) if it is bringing the smoke air into the building.

For information on the fire visit www.emergency.wa.gov.au for the most up to date information.

It would be advised that all staff and visitors stay inside Fremantle Sailing Club and do not attempt to go out into the smoke or attempt to drive in these conditions. Visibility will be low; emergency vehicles will be approaching and people do panic in these situations.

SPILLS (WATER)

All spills need to be reported to the Chief Warden or Warden in Charge as soon as possible. The spill kit may be used if applicable on smaller spills. On large spills the Fremantle Port Authority – All Spills Response / HAZMAT team may be required.

STORM PROCEDURES

Although the storm season runs from June to September non seasonal fronts can eventuate as a result of cyclonic events to the north of the state. These weather events can escalate rapidly and due to the northerly direction of the incoming surge and wind, catch pen and boat owners off guard. Throughout the winter storm period considerable numbers of marina occupants spend their time at other locations leaving their vessel unattended. It is important for members to be aware that **they are responsible for securing their boats and personal property on marina premises.**

EMERGENCY PLAN

Fremantle Sailing Club staff are not responsible for taking care of your boat before or during a storm. If you will be away from the area, you need to arrange for someone to monitor your boat. It is essential to have the boat prepared prior to the winter storm season which begins in June. FSC Marina staff should be informed of the duration that boat owner intends to be away from their vessel and details of the person responsible for looking after the vessel throughout that period.

Fremantle Sailing Club has links on the website to a variety of weather forecasting sources and staff monitor weather information daily. In the lead up to any specific weather event that may affect the marina, members will be informed by email to enact their storm procedures.

FSC staff will be monitoring the situation throughout the event and will provide constant updates.

Weather Forecasting Information Data used to Monitor Incoming Weather Events.

TERMS USED TO DESCRIBE THE TIME OF DAY IN OUR FORECASTS:

Early in the morning:	Expected to occur before 7am.
In the morning:	Expected to occur between 1am and 11am.
In the late morning:	Expected to occur between 9am and midday.
During early afternoon:	Expected to occur between 12pm and 4pm.
During the afternoon:	Expected to occur between 1pm and 9pm.
In the evening:	Expected to occur between 6pm and midnight.
Later in the evening:	Expected to occur after 9pm.

The wind strengths associated with the different categories of wind warnings issued by the Bureau are presented in the table below.

Remember that the wind speeds mentioned in forecasts and warnings are averages, and that wind gusts can be 40 per cent stronger, and stronger still in the vicinity of thunderstorms and squalls.

Strong wind warning	Winds averaging from 26 knots and up to 33 knots.
Gale warning	Winds averaging from 34 knots and up to 47 knots.
Storm force wind warning	Winds averaging from 48 knots and up to 63 knots.
Hurricane force wind warning	Winds averaging 64 knots or more.

PROCEDURES FOR WEATHER STRONG WIND WARNING

Winds averaging from 26 knots and up to 33 knots.

MARINA

- Staff to monitor weather information and update boat owners if weather conditions deteriorate.
- Staff undertake dock walks and check all jetty infrastructure and vessel dock lines are secure.
- Contact owners of vessels that may require stowage or remedial works to their mooring lines.
- Monitor Self Furling systems on yachts and inform owners of any potential issues that may need to be addressed. If required, and the owner cannot be reached, enact self-furling Jib containment procedure. Cross wrapping system with spare halyards from top of mast.

MEMBERS

Reduce Windage:

- Check and ensure all (including furled jibs), mainsails, sail covers, biminis, dodgers and other canvas are secure. For smaller storms, you can wrap sails with line to help secure them.
- Check life rafts and other large objects that can catch wind.
- Flags should be lowered and stowed.
- Halyards should be pulled away from the mast and snugged securely.

Dock Lines:

- Check for chafe and wear on dock lines and replace or double line if necessary.
- Please ensure that your lines can be adjusted from the dock. The bitter end needs to be on the dock, not on your boat. Some of these weather events have significant surge with water going over the docks.

→ **Note: DO NOT WAIT UNTIL THE LAST MOMENT TO SECURE YOUR BOAT– YOU MAY NOT BE ABLE TO GET TO YOUR BOAT.**

Boat Owner Identification:

- For owners planning to be away for extended periods ensure that contact details are visible from the vessel. This will allow FSC to contact the boat owner if needed during or after a weather event.

BOAT YARD

- Staff to monitor weather information and update boat owners if weather conditions deteriorate.
- Staff undertake yard inspection and ensure all vessels are securely chocked. Adjust all cradles, chocks and supports as required.
- Contact owners of vessels that may require stowage or remedial works to their vessel.
- Monitor Self Furling systems on yachts and inform owners of any potential issues that may need to be addressed. If required, and the owner cannot be reached, enact self-furling Jib containment procedure. Cross wrapping system with spare halyards from top of mast.
- Check all yard equipment is safely stored. Spray screens are to be furled.

PROCEDURES FOR WEATHER GALE WARNING

Winds averaging from 34 knots and up to 47 knots.

MARINA

- Staff to monitor weather information and update boat owners as weather conditions deteriorate. Begin to implement a plan at the first forecast that the projected path includes Perth Coastal Waters. This will normally give you several days to execute your plan. The BOM website shows 3-5 day track forecasts.
- Staff to undertake dock walks to check all jetty infrastructure and vessel dock lines are secure.
- Contact owners of vessels that may require stowage or remedial works to their mooring lines.
- Monitor Self Furling systems on yachts and inform owners of any potential issues that may need to be addressed. If required, and the owner cannot be reached, enact self-furling Jib containment procedure. Cross wrapping system with spare halyards from top of mast.
- Secure all Club boats and remove tenders from water if wind speeds are predicted to average above 40 knots.

EMERGENCY PLAN

- In the event of severe tidal /storm surge events that result in the jetties docks and piles being partially or entirely submerged FSC staff should assess the safety off access to members and contractors.
- If the tide and storm surge completely submerges the dock, including the height of the cable duct, power should be shut off to jetties.
- In the event of an electrical fault to the jetty that results in a main breaker tripping, power should not be attempted to be resupplied until an inspection from the Club electrician.
- In all circumstances during the peak period of the weather event staff will not attempt to rectify issues with vessels unless there is a risk of injury or life to members.

MEMBERS

Reduce Windage:

- Check and ensure all (including furled jibs), mainsails, sail covers, biminis, dodgers and other canvas are secure. For smaller storms, you can wrap sails with line to help secure them. If you are going away for an extended period throughout the winter period remove Jib from furling system.
- Check life rafts and other large objects that can catch wind.
- Flags should be lowered and stowed.
- Halyards should be pulled away from the mast and snugged securely.

Dock Lines:

- Check for chafe and wear on dock lines and replace or double lines if necessary.
- Please ensure that your lines can be adjusted from the dock. The bitter end needs to be on the dock, not on your boat. Some of these weather events have significant surge with water going over the docks. We will NOT go aboard boats to adjust lines.

Boat Systems:

- Check batteries for charge and charge if needed. Electricity to the docks may be lost or turned off if the storm surge is over the docks. Best not to leave food stored in the boat's ice box.
- Bilge pumps should be on automatic.
- Close the fuel and all overboard sea cocks.

Other:

- Ports, windows and hatches should be securely closed in watertight conditions.
- Remove all loose gear from decks.

→ **Note: DO NOT WAIT UNTIL THE LAST MOMENT TO SECURE YOUR BOAT– YOU MAY NOT BE ABLE TO GET TO YOUR BOAT.**

Boat Owner Identification:

- For owners planning to be away for extended periods ensure that contact details are visible from the vessel. This will allow FSC to contact the boat owner if needed during or after a weather event.

BOAT YARD

- Staff to monitor weather information and update boat owners as conditions deteriorate. Inform owners of FSC requirements regarding safe stowage of vessels on the hardstand. FSC Management have the power to require vessels to be removed from the yard if they are deemed to constitute a risk in storm conditions.
- Vessels determined to constitute a risk due their height / windage ratio (chocked or cradled), if seaworthy, should be returned to the water prior to the weather event.

- All vessels must be secured to a fixing point or stabilising weight to aid in stability.
- Staff undertake yard inspection and ensure all vessels are securely chocked Adjust all cradles, chocks and supports as required.
- Contact owners of vessels that may require stowage or remedial works to their vessel
- All Self Furling systems and sails to be removed from vessels and inform owners of any potential issues that may need to be addressed. If required, and the owner cannot be reached, remove sails or enact self-furling Jib containment procedure. Cross wrapping system with spare halyards from top of mast.
- Check all yard equipment is safely stored spray screens, ladders scaffold systems to be laid down.
- At the point of the event the conditions are deemed to be unsafe in the yard the yard will be shutdown to All persons. Staff to border off yard with traffic booms and signage.

MEMBERS

Reduce Windage:

- All sails to be dropped from vessels chocked or cradled on hardstand. Covers, Biminis, dodgers and other canvas are to be made secure or stored. Members are required to assist staff to provide advice and support on bollards and tie down points on their vessels in the process of securing them to a fixing point or stabilising weight.
- Check life rafts and other large objects that can catch wind.
- Flags should be lowered and stowed
- Halyards should be pulled away from the mast and snugged securely.

Boat Systems:

- Check batteries for charge and charge if needed. Electricity to the yard may be lost or turned off if the storm surge is over the surface. Best not to leave food stored in the boat's ice box.

Other:

- Ports, windows and hatches should be securely closed in watertight conditions.
- Remove all loose gear from decks.

PROCEDURES FOR STORM FORCE WIND WARNING

Winds averaging from 48 knots and up to 63 knots.

MARINA

- Staff to monitor weather information and update boat owners as weather conditions deteriorate. Begin to implement a plan at the first forecast that the projected path includes Perth Coastal Waters. This will normally give you several days to execute your plan. The BOM website shows 3-5 day track forecasts.
- Staff to undertake dock walks to check all jetty infrastructure and vessel dock lines are secure.
- Contact owners of vessels that may require stowage or remedial works to their mooring lines.
- Monitor Self Furling systems on yachts and inform owners of any potential issues that may need to be addressed. If required, and the owner cannot be reached, enact self-furling Jib containment procedure. Cross wrapping system with spare halyards from top of mast.
- Secure all Club boats and remove tenders from water.
- In the event of severe tidal /storm surge events that result in the jetties docks and piles being partially or entirely submerged FSC staff should assess the safety off access to members and contractors.

EMERGENCY PLAN

- Assess the safety of Live Aboard members and determine with FSC Management and the Board as to access to their vessels.
- If the tide and storm surge completely submerges the dock, including the height of the cable duct, power should be shut off to jetties.
- In the event of an electrical fault to the jetty that results in a main breaker trip, power should not be attempted to be resupplied until an inspection from the Club electrician
- In all circumstances during the peak period of the weather event staff will not attempt to rectify issues with vessels unless there is a risk of injury or life to members.

MEMBERS

Reduce Windage:

- All sails to be dropped from vessels
- Check and ensure, biminis, dodgers and other canvas are secure. If you are going away for an extended period throughout the winter period remove Jib from furling system.
- Check life rafts and other large objects that can catch wind.
- Flags should be lowered and stowed.
- Halyards should be pulled away from the mast and snugged securely.

Dock Lines:

- Check for chafe and wear on dock lines and replace or double lines if necessary. Insert chafing gear in lines if they are subject to wear in storm conditions.
- Please ensure that your lines can be adjusted from the dock. The bitter end needs to be on the dock, not on your boat. Some of these weather events have significant surge with water going over the docks. We will NOT go aboard boats to adjust lines.

Boat Systems:

- Check batteries for charge and charge if needed. Electricity to the docks may be lost or turned off if the storm surge is over the docks. Best not to leave food stored in the boat's ice box.
- Bilge pumps should be on automatic.
- Close the fuel and all overboard sea cocks.

Other:

- Ports, windows and hatches should be securely closed in watertight conditions.
- Remove all loose gear from decks.

→ **Note: DO NOT WAIT UNTIL THE LAST MOMENT TO SECURE YOUR BOAT- YOU MAY NOT BE ABLE TO GET TO YOUR BOAT.**

Boat Owner Identification:

- For owners planning to be away for extended periods ensure that contact details are visible from the vessel. This will allow FSC to contact the boat owner if needed during or after a weather event.

BOAT YARD

- Staff to monitor weather information and update boat owners as conditions deteriorate. Inform owners of FSC requirements regarding safe stowage of vessels on the hardstand. FSC Management have the power to require vessels to be removed from the yard if they are deemed to constitute a risk in storm conditions.

- Vessels determined to constitute a risk due their height / windage ratio (chocked or cradled), if seaworthy, should be returned to the water prior to the weather event.
- All vessels must be secured to a fixing point or stabilising weight to aid in stability.
- Staff undertake yard inspection and ensure all vessels are securely chocked Adjust all cradles, chocks and supports as required.
- Contact owners of vessels that may require stowage or remedial works to their vessel
- All Self Furling systems and sails to be removed from vessels and inform owners of any potential issues that may need to be addressed. If required, and the owner cannot be reached, remove sails or enact self-furling Jib containment procedure. Cross wrapping system with spare halyards from top of mast.
- Check all yard equipment is safely stored spray screens, ladders scaffold systems to be laid down.
- At the point of the event the conditions are deemed to be unsafe in the yard the yard will be shutdown to all persons. Staff to border off yard with traffic booms and signage.

PROCEDURES FOR HURRICANE FORCE WIND WARNING

Winds averaging 64 knots or more.

MARINA

- Staff to monitor weather information and update boat owners as weather conditions deteriorate. Begin to implement a plan at the first forecast that the projected path includes Perth Coastal Waters. This will normally give you several days to execute your plan. The BOM website shows 3-5 day track forecasts.
- Staff to undertake dock walks to check all jetty infrastructure and vessel dock lines are secure.
- Contact owners of vessels that may require stowage or remedial works to their mooring lines.
- Instruct all yacht owners to remove all sails. Monitor Self Furling systems on yachts and inform owners of any potential issues that may need to be addressed. If required, and the owner cannot be reached, enact self-furling Jib containment procedure.
- Secure all Club boats and remove tenders from water.
- It is likely that severe tidal /storm surge will result in the jetty docks and piles being entirely submerged. FSC staff will stop access to the jetties to all persons.
- Live-Aboard members will need to be found a safe place to hold up other than on their vessel.
- It is likely that the storm surge will inundate the marina completely submerging the dock, power must be shut off to jetties.
- At the culmination of the storm event power should not be attempted to be resupplied until an inspection from the Club electrician
- In all circumstances during the peak period of the weather event staff will not attempt to rectify issues with vessels unless there is a risk of injury or life to members.
- Shutdown power to Jetties from DB1
- Prepare for power up of generator at culmination of storm event and inspection of systems by FSC electrician.
- Prepare for significant damage to Jetty infrastructure and vessels. Ensure containment booms are ready to be deployed at marina entry.

MEMBERS

Reduce Windage:

- All sails to be dropped from vessels.
- Check and ensure, biminis, dodgers and other canvas are secure., If you are going away for an extended

EMERGENCY PLAN

- period throughout the winter period remove Jib from furling system.
- Check life rafts and other large objects that can catch wind.
- Flags should be lowered and stowed
- Halyards should be pulled away from the mast and snugged securely.
- **Disconnect power and remove cord from GPO socket.**

Dock Lines:

- Check for chafe and wear on dock lines and replace or double lines if necessary. Insert chafing gear in lines if they are subject to wear in storm conditions.
- Please ensure that your lines can be adjusted from the dock. The bitter end needs to be on the dock, not on your boat. Some of these weather events have significant surge with water going over the docks. We will NOT go aboard boats to adjust lines.

Boat Systems:

- Check batteries for charge and charge if needed. Electricity to the docks may be lost or turned off if the storm surge is over the docks. Best not to leave food stored in the boat's ice box.
- Bilge pumps should be on automatic.
- Close the fuel and all overboard sea cocks.

Other:

- Ports, windows and hatches should be securely closed in watertight conditions.
- Remove all loose gear from decks.

BOAT YARD

- Staff to monitor weather information and update boat owners as conditions deteriorate. Inform owners of FSC requirements regarding safe stowage of vessels on the hardstand. Due to the catastrophic nature of a **Hurricane force wind event** it is likely that vessels will not withstand the wind strengths whilst supported in the Boat Yard. All vessels that are seaworthy should be returned to the water.
- Vessels determined to constitute a risk due their height / windage ratio (chocked or cradled), if seaworthy, should be returned to the water prior to the weather event.
- All vessels must be secured to a fixing point or stabilising weight to aid in stability.
- Staff undertake yard inspection and ensure all vessels are securely chocked Adjust all cradles, chocks and supports as required.
- Contact owners of vessels that may require stowage or remedial works to their vessel
- All Self Furling systems and sails to be removed from vessels and inform owners of any potential issues that may need to be addressed. If required, and the owner cannot be reached, remove sails or enact self-furling Jib containment procedure. Cross wrapping system with spare halyards from top of mast.
- Check all yard equipment is safely stored spray screens, ladders scaffold systems to be laid down.

→ **Note: IT IS LIKELY THAT YARD WILL BE INUNDATED WITH WATER AND THAT UNSECURED OBJECT WILL BECOME PROJECTILES.**

→ **Note: THE YARD WILL BE CLOSED TO ALL PERSONS.**

MEDICAL EMERGENCY

CODE BLUE

All medical situations that are life threatening and serious in nature call **“000 – Ambulance”** immediately (provide your name, location address, information on what has happened and the casualty’s situation). Inform the first aid responder and Warden in Charge and let the most medically qualified person take control of the situation.

FIRST (1ST) AID KIT LOCATIONS

(Refer to the evacuation diagrams for exact locations)

- Ground Floor
- First Floor
- Junior Club House
- Maintenance Shed
- Office and Club Facilities
- Retail First Floor
- Retail Ground Floor
- Works Shed First Floor
- Works Shed Ground Floor

- Document or mark the known or expected entry point.
- Have a structured response including a land search, that also incorporates the jetties.
- This search will start from the expected entry point, fanning outwards.
- Have the first aid kit and DEFIB available and ready to be used by the most medically qualified person available.
- If the person is located and unresponsive follow the Unconscious Persons Procedure (below).

DEFIB LOCATION

(Refer to the evacuation diagrams for exact locations)

- Ground Floor (Coffee Terrace)
- Works Office (First Floor)
- Onboard The Vessel Success

UNCONSCIOUS PERSONS - D.R.S.A.B.C.D (Call “000” immediately)

Danger

Is there additional danger that needs attention, to prevent further injury.

Response

Is the casualty responding? Squeeze the muscle above the collar bone, and call their name.

Send

Send somebody to get help - call **“000”**.

Airway

Check that the airway is not compromised, place the casualty on their side and check for any foreign matter.

Breathing

Is the casualty breathing?

- Yes, place them in the recovery position.
- No, place them on their back and start CPR.

CPR

Cardiac Pulmonary Resuscitation is done with 30 chest thrusts & 2 breaths every 30 seconds.

Defibrillator

If available on site - Follow the instructions and place the defibrillator on the casualty.

DROWNING – D.R.S.A.B.C.D

(Call **“000”** immediately)

Or missing person expected to be in the water.

- Notify Warden in Charge.
- Ensure Emergency Services are informed.
- Stop all unauthorised boating in and around the area.

CUTS

Inform the first aid responder and Warden in Charge, let the most medically qualified person take control of the situation. Place a clean bandage, cloth, t-shirt or hand over the cut to stem the bleeding. Leave the original layer on, place a firm bandage over the injury and continue to add more bandages if needed seek medical assistance if required.

EYE INJURY

Inform the first aid responder and Warden in Charge, let the most medically qualified person take control of the situation. Turn the casualties head to the side with the injured eye being lower. Wash large amounts of clean water over the eye. Place a patch over the eye and seek medical assistance if required.

BURN

Inform the first aid responder and Warden in Charge, let the most medically qualified person take control of the situation. Immediately place the affected area under running water for up to 20 minutes, the water is to be cool, and a tap or shower is the best option. If any clothing is wet with hot liquid or affected by a chemical splash, remove it quickly and carefully. If skin starts to tear or removes with the clothing leave it on and continue to cover the area in large amounts of water. If possible, remove any tight clothing, watches, rings, or jewellery from the injured area, this will prevent further injury because of swelling from the burn. Seek medical assistance if required.

CRUSH

Inform the first aid responder and Warden in Charge, let the most medically qualified person take control of the situation. This emergency will need to be dealt with by paramedics as soon as possible. The area needs to be made safe and the actions of the most medically qualified person should be in consultation via phone with Emergency Services.

SEIZURE OR FIT

Inform the first aid responder and Warden in Charge, let the most medically qualified person take control of the situation. Immediately remove all hazards from the person and area. DO NOT RESTRAIN the person, clear all objects away from the person that may cause additional harm. Ensure "000" has been called and if the person is known and the seizures or fits are common seek their medical information and possible medication. Medication is only to be given if a pre - plan and consent has been given or under the authority of St Johns (000) or medical professionals.

SPRAINS OR STRAINS

Inform the first aid responder and Warden in Charge, let the most medically qualified person take control of the situation. Ensure they stop what they are doing, sit them down and take all weight off the injured part of the body. Follow the RICER acronym for treating this injury.

- **Rest** the injured body part
- Apply **ice** to the injured area for 20 minutes every 2 hours
- Place **a compression** bandage on the injured area
- **Elevate** the injured part to reduce swelling
- **Refer** the person to a qualified professional

FALLS

Inform the first aid responder and Warden in Charge, let the most medically qualified person take control of the situation. If there is uncertainty of injuries allow the person to remain in the current location as comfortable as they can be. Contact St John Ambulance "000" if necessary and consider evacuating other occupants within the area.

ALLERGIES

An allergy is an abnormal immune response where a person's immune system responds to a harmless substance as though it may cause them harm. Allergic reactions may be present in the following ways:

- Respiratory System – Breathing, Airways, Throat, Nasal Passage
- Skin – Hives, Rash, Swelling
- Gut – Vomiting, Stomach Cramps, Diarrhoea
- Heart and Circulation – Fall in blood pressure resulting in collapse / unconsciousness

EPIPEN AND ANAPHYLAXIS

If the casualty has an ASCIA Action Plan, follow it. Casualties with Anaphylaxis will have an EpiPen which will need to be administered as soon as possible.

If Conscious:

- Lay the casualty down flat, or if struggling to breathe, let them sit.
- Send for help and locate the casualties EpiPen if applicable.
- Administer the EpiPen according to its instructions.
- Record the time the EpiPen was administered.
- Check **“000” ambulance** has been called.
- Loosen and remove tight clothing around the neck, chest and waist. Remove watches, rings, bracelets in case of swelling.
- Monitor and care for airway, breathing and circulation.
- Hand over information to the arriving Ambulance crews.

If Unconscious:

D.R.S.A.B.C.D (Call “000” immediately)

Danger

Is there additional danger that needs attention, to prevent further injury.

Response

Is the casualty responding? Squeeze the muscle above the collar bone, and call their name.

Send

Send somebody to get help - call **“000”**.

Airway

Check that the airway is not compromised, place the casualty on their side and check for any foreign matter.

Breathing

Is the casualty breathing?

- Yes, place them in the recovery position.
- No, place them on their back and start CPR.

CPR

Cardiac Pulmonary Resuscitation is done with 30 chest thrusts & 2 breaths every 30 seconds.

Defibrillator

If available on site - Follow the instructions and place the defibrillator on the casualty.

ALL CLEAR

NO COLOUR CODE

The emergency can only be deemed “all clear” by the Warden in Charge or the attending Emergency Services.

The all clear will be delivered to staff, contractors, and visitors verbally. By making the all clear announcement you are informing all people present that the emergency has been mitigated, investigated, deemed to be a false alarm and all services to the site are in normal working order. Meaning all areas within Fremantle Sailing Club are safe and normal.

WARDEN ANNOUNCEMENTS

ANNOUNCEMENT (ALL CLEAR - FIRE ALARM ACTIVATION)

“Attention Attention all staff & visitors - The fire alarm was activated and is a **false alarm**. You may return to normal duties and we apologise for any inconvenience this may have caused – Thank you.”

ANNOUNCEMENT (ALL CLEAR - OTHER INCIDENT OR EMERGENCY)

““Attention Attention all staff & visitors - The alarm was activated and is a **false alarm**. You may return to normal and we apologise for any inconvenience this may have caused – Thank you.”

ANNOUNCEMENTS (EMERGENCY - FIRE ALARM ACTIVATION)

“Attention Attention all staff - We have a confirmed code RED. All staff are to render their area’s safe and start evacuating all occupants calmly to (the nominated emergency muster point).”
(repeat).

“Attention Attention all staff - We have a confirmed code RED. All staff are to render their area’s safe and start evacuating all occupants calmly to (the nominated emergency muster point).”

ANNOUNCEMENT (EMERGENCY - OTHER)

“Attention Attention all staff - We have a confirmed code (apply appropriate code colour). All staff are to render their area’s safe and start evacuating all occupants calmly to (the nominated emergency muster point)”
(repeat).

“Attention Attention all staff - We have a confirmed code (apply appropriate code colour). All staff are to render their area’s safe and start evacuating all occupants calmly to (the nominated emergency muster point).”

BUILDING EVACUATION REPORT

This form is to be used to record occasions when the Fire Alarm is activated, including drills or planned emergency evacuations. The report is to be completed by either:

- Chief Warden, Deputy Chief Warden or Warden in Charge onsite.
- Alternatively, the report can be completed by a staff member performing in an emergency management role should any of the above not be present.

Site: _____

Date: _____ **Time:** _____

Did DFES attend: Yes No **DFES Incident Number:** _____

Cause of Fire Alarm Activation: Training Drill Fire Agents Personal Threat
 Bomb Threat Unknown

Did other Emergency services attend: Police Ambulance Other

How were the Emergency Services notified? _____

Any injuries? _____

Was there any damage? _____

Areas for improvement: _____

PERSONAL EMERGENCY EVACUATION PLAN (1/2)

PEEP's are individualised emergency evacuation plans designed for mobility impaired staff or regular volunteers but not limited to who may require assistance during an emergency. To facilitate reference by the emergency services, a copy of the PEEP should be kept with the relevant Warden and the applicable assistant with an additional copy kept in a central location which is readily accessible to the responding emergency services. The information on the PEEP shall be disseminated to all people responsible for its implementation.

Person Name: _____

Phone/Ext: _____ Mobile: _____

Email: _____

Site: _____

Work Location: _____ Floor Number: _____

Assistance animal involved: YES / NO Description: _____

Is the occupant trained in emergency response procedures? YES / NO

The occupants preferred methods of receiving updates to the emergency response procedures (text, email, braille, etc):

The occupants preferred method of notification of an emergency (text, visual alarm, vibrating device, etc):

Type of assistance required: _____

Equipment required for evacuation: _____

Egress procedure (step by step details): _____
